Jamia Millia Islamia,
New Delhi

Dr. Sulthan Mohiddin Shariff
Convener – TSFA - IDL

About the International Day of Light:

The International Day of Light is a global initiative that provides an annual focal point for the continued appreciation of light and the role it plays in science, culture and art, education, and sustainable development, and in fields as diverse as medicine, communications, and energy. The broad theme of light will allow many different sectors of society worldwide to participate in activities that demonstrate how science, technology, art, and culture can help achieve the goals of UNESCO – education, equality, and peace.

Celebration of the International Day of Light:

The International Day of Light will be held on 16 May every year, the anniversary of the first successful operation of a laser in 1960. The laser is a perfect example of how a scientific discovery can yield revolutionary benefits to society in communications, healthcare and many other fields. Laser science is internationally recognized in over 20 Nobel prizes. The International Day of Light however is not just about science – the themes cover all areas of light in its general sense including art, culture and development

- > Lectures on the theme of application of light and laser by Chief Guest, Program Convener and Other Eminent Dignitaries
- > Presentation of winning projects of students from class VIII to X on application of light/optics/laser in fields of **Physical Sciences (A)**, **Chemical Sciences (B)**, **Life Sciences (C)** and **Arts/Media Communications (D)** (In each category I, II Prizes) Felicitations and prize distribution for awardees with their guides.
